## SUMMARY

---

Software engineer with 6+ years of experience building scalable, high-availability systems in cloud environments. Skilled in full-stack development (Java, JavaScript, React.js, SQL) and AWS cloud (CDK/Terraform, Lambda, S3). Experienced in designing, launching, and optimizing products used by millions, with expertise in distributed systems, CI/CD, and agile practices.

## EDUCATION

---

### Master of Science, Computer Science (Part-time, Online)

Georgia Institute of Technology

Expected 2027

*Atlanta, GA*

### Bachelor of Computer Systems Engineering

Colombian School of Engineering Julio Garavito

Aug 2019

*Bogotá, Colombia*

## PROFESSIONAL EXPERIENCE

---

### Amazon

Software Development Engineer

Sep 2022 – Present

*Madrid, Spain*

- Increased Amazon Business Registration website resilience by integrating automated load tests into CI/CD pipelines, ensuring every new change maintained production capacity.
- Enabled public sector companies to register on Amazon Business by developing entity-identification mechanisms and propagating attributes across downstream services.
- Reduced notification (Email/SMS) latency by 50% by migrating to a new notification service and redesigning the system's architecture.
- Resolved critical data corruption affecting 100+ downstream dependencies by fixing AWS Lambda code and executing large-scale backfills on relational databases.

### Scotiabank

Full Stack Software Engineer Specialist

Apr 2021 – Aug 2022

*Bogotá, Colombia*

- Accelerated mortgage processing in ScotiaHome (Scotiabank Canada Mortgages App) by leading development of a feature that restricted advisors to verified addresses, eliminating manual entry errors.
- Supported employee career growth by teaching programming in Scotiabank's internal bootcamp.

### Blackboard

Associate Software Engineer

Nov 2019 – Apr 2021

*Bogotá, Colombia*

- Improved performance of Learn/Ultra course outline by 30% by refactoring redundant React components.
- Increased Learn/Ultra product resilience by writing automated end-to-end tests covering feedback and rubrics evaluation flows.
- Contributed to the Learn/Ultra rubric evaluation system used by 1M+ customers by developing several core frontend components.

## TECHNICAL SKILLS

---

### Programming

Java, JavaScript, Python, SQL

### Frontend Frameworks

React.js, Vue.js

### Cloud & Tools

AWS (CDK, Lambda, EC2, S3, SQS, SNS), Terraform, Git, CI/CD
